

Tip of the Month

February 2016

Provided by Elaine Theriault of Northcott

Before you store your pieces of leftover batting, attach a note with the size of the batting. These leftover pieces are never exactly straight, so I do a quick measure along the shortest sides. I use a safety pin to attach the note so it won't get lost.

When you are looking for batting for your next project, it will be so easy to find the right sized piece!
