

are found in the atmosphere in the form of Carbon Dioxide. **TEST TUBES** LOOK CLOSED. **GRAVITY** ETNSTETN. Atoms are made of particles called protons, electrons and neutrons. **Nitrogen** Nitrogen is present in all living things including the human body. **MAGNETISM** Electricity is a form of energy and it occurs in nature. It can be made from Wind, Water and Sunlight.

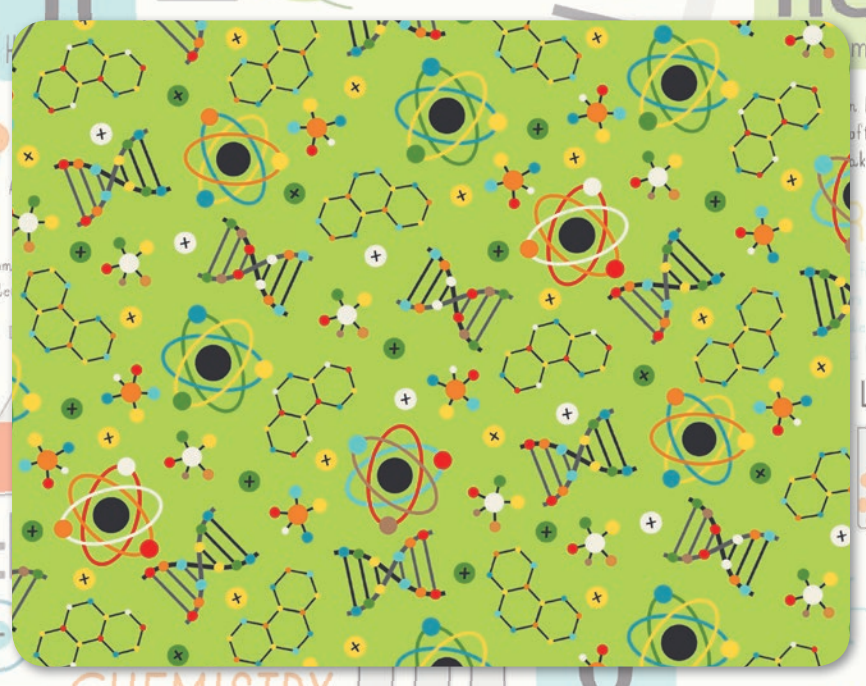

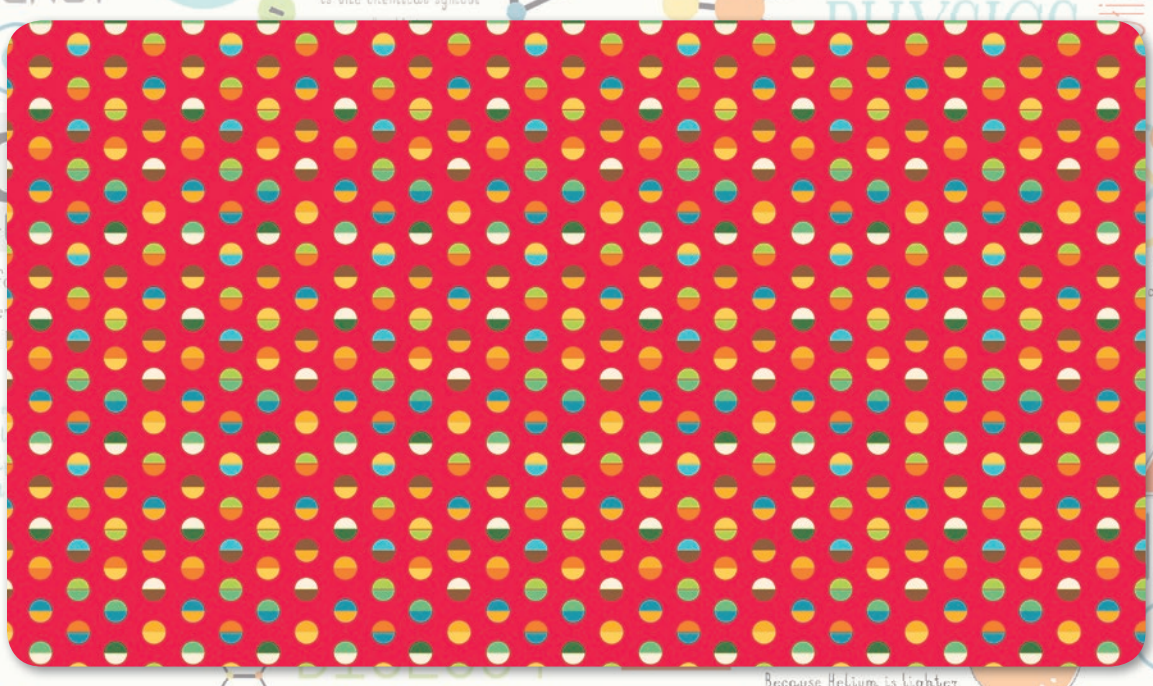

Tiny Treasures

by Deborah Edwards

Little Genius

A dense collage of science-related text in various colors and fonts. Words include: Hydrogen, Gravity, Einstein, Biology, Physics, Chemistry, Atom, DNA, Magnetism, Electricity, Energy, Test Tubes, Experiments are Fun!, Light, Force, Helium, Nitrogen, Carbon, Microscope, and E=mc². Small explanatory text snippets are interspersed, such as "Because Helium is lighter than air, it is often used to fill balloons and make them float" and "All living organisms on earth are divided into cells. Cells can only be seen under a microscope".
