KENSINGTON PARK

by Deborah Edwards

Created by Deborah Edwards, Kensington Park is an elegant bridge between traditional and transitional style with exquisitely detailed florals, birds and butterflies highlighted with gold metallic. The refined palette of Cream, Black and Robins Egg has widespread appeal in quilting, fashion and home decor. The geometric prints offer sophisticated contrast to the organic floral and butterfly prints while the full width border has endless creative possibilities. The border print makes an ideal skirt for apparel or a bed skirt. It works equally well for a border on a quilt or tablecloth. A selection of Colorworks and Radiance complete the collection.
