Windsong

by Northcott Studio

Florals, especially black and white are trending. Created by the Northcott Studio, Windsong features beautifully illustrated florals in a soft watercolor technique. The selection of multi-directional florals are offered in a wide variety of scales and values adding depth and dimension to your projects. The featured prints are complemented by charming coordinates and blenders. Though mostly black and white, with many shades of gray, a pop of yellow adds interest and appeal to the group. A variety Simply Neutral prints as well as Toscana blenders completes the coordination.
