Tenderwood

by Sherri Buck Baldwin

Created by talented artist and designer, Sherri Buck Baldwin, Tenderwood is characterized by beautifully illustrated forest animals. The collection features ferns and footprints, as well as a variety of natural textures inspired by a woodland palette of browns, tans, grays and greens. The focal print appears to be a panel, but is actually running yardage offering maximum flexibility. The featured block print can be deconstructed and reconstructed in a variety of ways. This endearing collection is ideal for young and old alike working equally well as a nursery quilt, a lap quilt, a table topper, placemats and even toss cushions.
