# LUMINO<sup>SITY</sup> by Deborah Edwards

Created by Deborah Edwards, Luminosity is characterized by an eclectic mix of butterflies, dragonflies, feathers and wings in a shimmering palette of navy, lagoon, turquoise, green and lime with gold metallic accents. The panel features dragonflies and butterflies with a nouveaux inspired border. Additionally, there are two coordinating full width borders, one an ombre of peacock feathers and the other a damask incorporating dragonfly and butterfly motifs with feather textures creating a bohemian appearance. Deconstruct and reconstruct the panel and full width border prints to fashion something completely new and creative. A selection of classic Shimmer textures and Radiance colors coordinate beautifully with the collection.
