GAMING ZONE

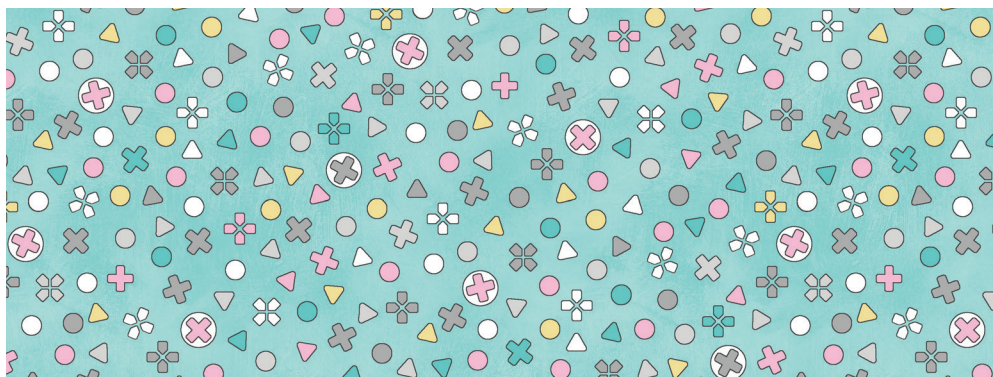

by Northcott Studio

What are most kids doing in their spare time during while trying to dodge COVID? Gaming! It is a great way to socialize online with friends. Motivated by the amount of gaming going on in her own household, Deborah Edwards created Gaming Zone a collection for the young and young at heart, for boys and yes, for girls too! Gaming Zone features gaming controllers, inspirational gaming words, circuit boards, USB Cables and a few vintage inspired prints reminiscent of Tetris and Space Invaders. Most of the Gaming Zone prints reflect the traditional primary gaming colors, but we have also offered a selection of feminine prints featuring pink, turquoise, gray and yellow. A variety of Toscana prints coordinate beautifully with both palettes. Get into the Zone with Gaming Zone.
