# Aurora Borealis

by Dawn Gerety

The Aurora Borealis is a spectacular natural light display witnessed around the world, though predominately in the Arctic and Antarctic. Cascading colors creating shapes associated with fire in the sky and mythical creatures have shaped legendary folklore since ancient times. Created by Alaskan artist Dawn Gerety, Aurora Borealis reflects the beauty of the northern lights in bold color. A shadow play of animals highlighted in the panel and focal prints add contrast to the colorful backdrop. The panel makes an ideal tryptic wall-hanging or featured blocks in a quilt. A selection of unique textural prints reflect the northern lights in a variety of vibrant hues while a selection of Toscana prints complete the coordination. Experience the magic of Aurora Borealis!
