@paperloftfabrics

Additional materials needed for one placemat:
60" x 20" of backing fabric, 14" x 20" of fusible Warm Iron-on or batting, 80" prepared strip of 2 1/2" wide binding, coordinating threads.

- Instructions
1. Cut mats from the fabric panel on the outer dashed cut lines, as indicated by the scissors.
 2. Sandwich the mat, fusible fleece or batting and the backing fabric with the wrong side of the fabric against the fusible fleece or batting.
 3. If you're using fusible fleece, place the quilt sandwich on an ironing board and press through the layers, using steam to lightly fuse them together. Avoid pressing toward the outer cut edge of the mat.
 4. Cut the mat as needed. When quilting in fusible, trim along the wrong fabric from the perimeter of the mat by cutting on the edge of the prepared mat.
 5. Bind the six edges of the mat using the prepared binding for information on how to prepare and apply binding, you can download a tutorial with some great tips at <http://www.paperloftfabrics.com/instructiondownloads.htm>.
