DP24858-48 | Astronauts | Navy

DP24857-46 | Planets | Blue Multi

# UNIVERSE

by Adrian Chesterman and Northcott Studio

Explore the wonders of the Universe, created by Adrian Chesterman. The oversized panel is a riot of color set against deep blue and features planets, solar flares, asteroids, stars, and satellites. Add the border stripe and the panel makes an ideal lap quilt or focal point for a larger quilt. Coordinating multi-directional prints including planets, astronauts, and constellations as well as nebula textures in a variety of bold colors complement the panel and ombre. Wide backing featuring the constellations and a selection of Toscana prints complete the collection.
