

# ColorWorks concepts

Exclusively from **NORTHCOTT** [www.northcott.com](http://www.northcott.com)

ColorWorks Concepts is a completely innovative program featuring colorful panels and prints that coordinate with Northcott's ColorWorks Premium Solids. The panels are printed to look like complex piecing projects. Since there is no piecing you can move onto adding borders, quilting and embellishing, making this an ideal collection for quick sew projects. ColorWorks Concepts is divided into Phase I & II and there are 7 coordinating 24" panels for this collection.
