

Coloring Book

Who says coloring books are just for kids! As adults, we love coloring to relieve the everyday stresses and release our creativity. We may have traded in our crayons for colored pencils, watercolors or pastels, but it still evokes the fond memories we have as kids spending hours coloring inside and outside the lines.

The designs in our Coloring Book collection are all grown up too, with multicolored stylized florals and saturated tone-on-tones. Let your creativity jump off the page as you color your quilts in this fun, vibrant collection!
